## FEMINISTO

# PREAMBLE

We are a group of Zimbabwean women who use feminism as our political standpoint, analytical framework, and guiding vision. We are committed to a liberatory project that encompasses political, socio-cultural, spiritual, sexual, and economic transformation. We live and work in and outside of Zimbabwe and have a shared vision of a Zimbabwe that embraces diversity and is inclusive.

# Public Services & Infrastructure that work

We want infrastructure that works and we want public services that work, affordable or free and easily accessible in both rural and urban areas and are responsive to our rights and needs. This includes clean water, decent housing, electricity, streetlights, quality universal health care, and reproductive health care services.

# ECONOMIC JUSTICE

#WhatWomenWant

We want a Zimbabwe where economic needs are met in a just and equitable manner. Recognizing the inequalities that exist in our society that have excluded women from the mainstream economy, we want equal access to and control of land and other productive resources, decent jobs, equal pay for equal work, better working conditions, and access to cash and finance and recognition and value for unpaid and domestic care work. Our leaders must actively eliminate the very wide economic inequalities and disparities in present-day Zimbabwe through a redistributive policy agenda. Younger women want an economy in which they can dream and thrive.

(Body Autonomy)

# **My body My choice**

---

**We want a Zimbabwe where all women in our sexual diversities and all people can fully exercise their sexual rights, bodily autonomy, and agency without fear of reprisal or attack**

## **Cultural Production (Freedom of Artistic Expression)**

We want a Zimbabwe where women are free to engage in artistic expression without fear of reprisals and where our work in this sphere is valued and seen as a contribution to the legacy of Zimbabwe's HerStory.

### ACCOUNTABILITY AND AN END TO IMPUNITY

We want a Zimbabwe where minerals and resources are used to enrich the country as a whole and the people residing in it. Decision making on public rights, resources, interests, and services must be open and transparent to not cede, mislead or expedite decisions in the interests of vested individuals, companies, or elites.

# WOMEN IN PUBLIC LIFE

We want full and equal participation of women in all decision-making structures and processes that impact our lives. From community management structures to district development or local and national governance, we want full and equal rights to participate without fear.
